Professional Summary

Front-End Engineer with 8 years of software engineering experience building and supporting customer-facing web platforms for users worldwide. Builds responsive, accessible interfaces in React, TypeScript and Next.js, backed by hands-on experience with APIs, CI/CD, monitoring and production troubleshooting. Known for dependable releases, clear technical documentation and turning requirements into polished, maintainable UI. Trilingual in English, Spanish and French, and able to work across US and European hours.

Technical Skills

- **Front End:** JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS
- **Front-End Practices:** Responsive and mobile-first design, web accessibility (WCAG), reusable component architecture, REST API integration, form validation, web performance optimization, cross-browser compatibility
- **Testing and Quality:** Jest, React Testing Library, performance testing, debugging, monitoring and tracing
- **Tools and Workflow:** Git, GitHub, GitHub Actions, CI/CD, Vite, npm, Figma, Postman, technical documentation
- **Back End and Cloud:** Node.js, PHP, PostgreSQL, Docker, AWS, Azure

Professional Experience

Software Engineer — B12

January 2025 – January 2026

- Supported the website generation, publishing and client-portal services customers rely on to launch and manage their websites.
- Strengthened release decisions and shortened troubleshooting by adding monitoring, tracing and targeted tests to production services.

- Wrote clear technical documentation that helped engineers diagnose issues and ship changes with confidence.

Front-End Developer — Freelance

2025 – Present

- Deliver responsive, mobile-first websites and reusable UI components for clients using React, TypeScript and Tailwind CSS.
- Translate client requirements and Figma designs into accessible layouts with clear navigation and consistent styling.
- Integrate REST APIs with robust loading, error and form-validation states, and resolve cross-browser issues.
- Manage changes in Git and GitHub, test functionality, improve page performance and deliver client revisions.

Software Engineer — Kashiko

November 2022 – November 2024

- Maintained customer-facing API and portal services, investigating and resolving production issues.
- Improved visibility into application errors so the team could detect and fix problems sooner.
- Contributed to performance testing and CI/CD practices that kept releases reliable during traffic peaks.
- Wrote and maintained service documentation for engineering and support teams.

Software Engineer — EON Reality

2018 – September 2022

- Supported web services and 3D content delivery for education users worldwide, improving download reliability and performance.
- Built automated release health checks that caught problems before they reached users.
- Diagnosed user-facing issues through testing, log analysis and issue reproduction.

Selected Projects

Task Management Web App — React, TypeScript, Node.js, REST API

- Built a responsive app for creating, organizing, filtering and tracking tasks, with typed API calls, reusable form components, validation and clear error states.

E-Commerce Storefront — Next.js, TypeScript, Tailwind CSS

- Built product browsing, search, filtering, cart and mobile navigation with accessible interaction patterns and optimized image loading.

Education

Associate's Degree, Information Technology — Strayer University

Languages

English, Spanish, French
