SKILLS

Front end

- React
- TypeScript
- Next.js
- JavaScript ES6+
- HTML5
- CSS3
- Tailwind CSS
- Redux Toolkit

Practices

- Responsive / mobile-first
- Accessibility (WCAG)
- Component architecture
- REST APIs
- Web performance

Testing & quality

- Jest
- React Testing Library
- Monitoring & tracing
- Debugging

Tools

- Git / GitHub
- GitHub Actions
- CI/CD
- Vite
- Figma
- Postman

Back end & cloud

- Node.js
- PHP
- PostgreSQL
- Docker
- AWS
- Azure

LANGUAGES

- English
- Spanish
- French

Wilmer Rodriguez

Front-End Engineer

React · TypeScript · Next.js · Node.js

PROFILE

Front-End Engineer with 8 years of software engineering experience building and supporting customer-facing web platforms for users worldwide. Builds responsive, accessible interfaces in React, TypeScript and Next.js, backed by hands-on experience with APIs, CI/CD, monitoring and production troubleshooting. Known for dependable releases, clear technical documentation and turning requirements into polished, maintainable UI. Trilingual in English, Spanish and French, and able to work across US and European hours.

EXPERIENCE

Front-End Developer · Freelance

2025 — Present

- Deliver responsive, mobile-first websites and reusable UI components for clients using React, TypeScript and Tailwind CSS.
- Translate client requirements and Figma designs into accessible layouts with clear navigation and consistent styling.
- Integrate REST APIs with robust loading, error and form-validation states, and resolve cross-browser issues.
- Manage changes in Git and GitHub, test functionality, improve page performance and deliver client revisions.

Software Engineer · B12

Jan 2025 — Jan 2026

- Supported the website generation, publishing and client-portal services customers rely on to launch and manage their websites.
- Strengthened release decisions and shortened troubleshooting by adding monitoring, tracing and targeted tests to production services.
- Wrote clear technical documentation that helped engineers diagnose issues and ship changes with confidence.

Software Engineer · Kashiko

Nov 2022 — Nov 2024

- Maintained customer-facing API and portal services, investigating and resolving production issues.
- Improved visibility into application errors so the team could detect and fix problems sooner.
- Contributed to performance testing and CI/CD practices that kept releases reliable during traffic peaks.
- Wrote and maintained service documentation for engineering and support teams.

EXPERIENCE (continued)

Software Engineer · [EON Reality](#)

2018 — Sep 2022

- Supported web services and 3D content delivery for education users worldwide, improving download reliability and performance.
- Built automated release health checks that caught problems before they reached users.
- Diagnosed user-facing issues through testing, log analysis and issue reproduction.

SELECTED PROJECTS

Groovy Grub [REACT APP](#)

React 18 · Redux Toolkit · React Router · Vite

Food & beverage e-commerce SPA with live search, category filters, product pages, a cart with promo codes, and checkout and sign-in flows, with cart, auth and UI state managed in Redux Toolkit slices.

ESL Learning Site [VANILLA JS](#)

JavaScript · DOM APIs · HTML5 · CSS3

English-learning site for French speakers with a bilingual EN↔FR glossary tooltip engine (TreeWalker + MutationObserver) and printable worksheets on common learner errors.

AI DJ [IN PROGRESS](#)

React · Vite · Node/Express · Spotify Web API · Claude API

Mobile-friendly music app that turns a plain-language "vibe" into a Spotify playlist via an LLM layer, with a thin Node backend handling OAuth and keeping API keys off the client.

EDUCATION & TRAINING

Associate's Degree, Information Technology · [Strayer University](#)

Complete React Developer · [Zero To Mastery](#)

- Redux, Redux Saga, GraphQL, React Router, Firebase, Stripe API, Progressive Web Apps, Jest testing
